

C. SOCIALES Y T.I.C

22/2/22

Sol Yamin, Juan Manuel Urigüen

Valentina Bouldin

Ap1 I.C.Ts Activity 1

[Welcome, today we're going to talk about ICTs]

- Do you know something about ICTs? {Juanma}

-Well... I.C.Ts are a group of resources, tools and media, they let us have a compilation of information, letting us transmit it. And you? What do you know about ICTs? {Sol}.

-I... know about their evolution through the time, ya know, how the people in the past used to use them, and how the ICTs changed, now we have the phones, but years ago they only have letters to communicate... and many many years ago, they used to write in rock and stuff like that. {Juanma}

-It's known too, that we use a lot of things that are ICTs, like computers or cell phones, but not only the new things are ICTs, typewriters are creations that our ancestors created to write in a more comfortable way. And well, they also have contributed a lot to change our everyday life, such as letter to email, market shopping to on-line shopping, etc. {Sol}

Well, Thank you all for hearing us, if you want to know about a specific theme, in the next video, just tell us. {Juanma}
